### DO YOUR BIT GLADLY

The Red Cross Drive is on. When you are called on for your contribution don't wait to be asked. When you see the Red Cross receipt book, hand over your contribution without waiting to be asked, and make the work of those who are gathering up these funds a pleasure instead of unpleasant.

The work the Red Cross is doing is of untold value to every enlisted man and woman in the Allied forces regardless of where they are or what they are doing. Red Cross passes international barriers with the aid bits and comforts that make life more pleasant. It is in the front lines with dressings, drugs, blood plasma, and what not to render first aid. It is in hospitals all over the world, providing freely the services which humanity in some cases cannot afford for themselves.

Today, you may feel that because your son or daughter are not in the thick of it, you have no responsibility, and you may be right. Tomorrow, however, it may be you or your kin that will be in need of assistance, and may benefit by the dollar you contribute today. In any event, you know full well that your Red Cross dollars will render service, and aid when it is needed and in the most economical way that these services can possibly be rendered.

### RATION COUPON BANKING NOW IN EFFECT IN CANADA

Montreal, March 3.—Ration Coupon Banking came into effect March 1st in 3,200 branches of the chartered banks of Canada. For the first time Canadian business houses will now be writing cheques, and the banks holding accounts, expressed in terms of coupons for sugar, tea or coffee, or butter, instead of in terms of dollars and cents. The system will, of course, not interfere with the normal method of settling accounts between merchants which will continue to be paid by cash, bank cheque, etc.

L. B. Unwin, Administrator of Consumer Rationing for the Wartime Prices and Trade Board stated that the arrangement is one whereby considerable additions to the Ration Administration's staff will be averted, and the details of handling coupons by certain retailers, wholesale houses and supplies will be greatly simplified. "Coupon Ration Banking," Mr. Unwin said "will go a long way towards solving the problems of siphoning off, accurately accounting for and preventing dangerous accumulations of coupons." He said the plan had been endorsed by the Minister of Finance and that Donald Gordon, Chairman of the Wartime Prices and Trade Board, had written to

ent, you know full well that your Red Cross dollars will render service, and aid when it is needed and in the most economical way that these services can possibly be rendered.

Charles St. Pierre, President of the Canadian Bankers' Association, expressing appreciation of the banks' cooperation in working out a method and undertaking to put it into operation. "This," Mr. Unwin said, "is a substantial public service. Every one of the 3,200 branch banks across Canada will share in the work. The plan represents a considerable cash saving to the country, as contrasted with the only alternative, namely, for the Board to establish its own separate coupon banking system across Canada."

The system which went into effect on Monday, was the outcome of a series of conferences between Wartime Prices and Trade Board's rationing officers and a committee of technical officers named by the chartered banks, which had offered to undertake the task involved in ration coupon banking.

Outlining the system, Mr. Unwin remarked; "Soon it will

not even be novel for a merchant to write a ration cheque for the coupon equivalent of 1,000 pounds of butter or sugar, tea or coffee, and have it charged against his 'Ration Coupon Account' for that commodity.

"Every retailer, wholesaler and producer or distributor of rationed commodities is affected. Here is how it works. The retailer will stick down on gummed sheets provided him, the coupons he receives from his customers. Depending on whether his turnover in foods is large, medium or small he will deposit these coupons in a 'Ration Coupon Bank Account,' exchange them for a 'Bank Transfer Voucher' or send them direct to his supplier with his order for a fresh stock of the commodity represented.

Mr. and Mrs. Tommy Roberts received a letter recently from their son John, who is in the service in England. The letter was 35 days enroute and when John wrote he was feeling fine.

Miss Jeanette Heninger, who is attending Henderson Business College in Calgary, is home for a few days, here to attend the wedding reception of her sister Marva.

## WARNING

### CANADA FACES A WOOD-FUEL FAMINE NEXT WINTER

ARE YOU one of the Canadian householders who burned fences, doors, and even flooring to keep warm in this winter's sub-zero weather? Or perhaps you are one of the lucky ones who just managed to scrape through?

In either case, you will want to be prepared for next winter when greater hardships loom unless you take immediate action.

The shortage already has affected many communities... total stocks of dry wood are nearly exhausted... in some places the small supply of green wood cut for next winter is being used now to meet the present emergency.

Throughout most of Canada, fuel-wood is obtained not far from where it is consumed. Its production and distribution are the business of local citizens.

The Dominion Government recognizes that the wood-fuel shortage is so serious that even with the full co-operation of everyone in affected communities an adequate supply is not assured. Accordingly, it has been decided to stimulate the output of wood-fuel by assisting those normally engaged in its production and distribution. To this end, the following measures will be adopted:

- 1 A subsidy of \$1.00 per cord will be paid to dealers on all commercial fuel-wood contracted for and cut on or before June 30, 1943, and held to dealers' account on that date.
- 2 The Coal Controller has been authorized to arrange in his discretion for the payment of such portion of the transportation costs as he considers proper in respect of fuel-wood, particularly in cases where dealers, to procure supplies, find it necessary to contract for fuel-wood at locations outside the area from which they normally derive their supplies. In order to obtain any such reimbursement, dealers must obtain a permit from the Coal Controller before contracting for such supplies.
- 3 The Coal Controller will repurchase from dealers at dealer's cost all commercial grades of fuel-wood on which a subsidy of \$1 per cord has been paid and which are still in dealers' hands as at May 31, 1944.
- 4 Assistance will be given in providing priorities for necessary equipment.
- 5 Farmers now on the farm, and who leave the farm temporarily in response to this appeal to engage in fuel-wood cutting, will be deemed by National Selective Service to be carrying out their regular occupation as farmers and will be given all the rights of deferment of military service which such an occupation now carries. Such temporary absence should not, however, interfere with agricultural production.

Municipal councils, farmers, fuel dealers, individual citizens, service clubs, and all other groups in communities where wood-fuel is burned, are urged to begin at once a rapid survey of their local situation, and to take immediate action to relieve the shortage.

### Ergot of Cereals and Grasses

Ergot is an important disease because it reduces grain yields and, when present in feed grains, may cause acute poisoning, or even death, in farm animals.

Ergot is most noticeable in rye, but also attacks barley, wheat (especially durum) and occasionally oats. The same ergot also attacks many native and cultivated grasses. Ergot bodies (called sclerotia) produced on grasses constitute an important source of infection for cereals. Infected hay crops should be cut before sclerotia have time to develop. Early stages of infection may be identified by the presence of droplets of sticky exudate on the heads or panicles.

Ergot bodies falling to the ground when mature, remain dormant until midsummer and then germinate. Countless tiny spores are discharged and carried about by the wind. The lucky ones lodge in the flowers of grasses or cereals and set up infection resulting in a new generation of ergot bodies.

Control measures include early cutting of infected native and cultivated grasses, and deep plowing of fields on which infected grain crops grew. Ergot bodies can be removed from seed grain by immersing the grain in a solution of common salt consisting of 40 pounds of salt in 25 gallons of water. When the grain is immersed and agitated, the ergot bodies rise to the surface. The grain must then be washed to prevent injury from salt.

Farmers may secure, from line elevator agents, a circular in which this disease is discussed more fully. For additional information apply to Dominion Laboratories of Plant Pathology at Winnipeg, Saskatoon or Edmonton. Contributed by A. M. Brown, Assistant Plant Pathologist, Dominion Laboratory of Plant Pathology, Winnipeg.

CANADA'S CALL FOR 35 MILLION POUNDS OF WASTE FATS

The lives of the United Nations' Soldiers, airmen and sailors mostly depend upon the speedy response to this S.O.S. Fats and Oils are the raw materials from which glycerine is produced. Glycerine is the basic and indispensable ingredient in the majority of our explosives.

If everyone in Canada saves as little as two ounces of waste cooking fat in a week, it will produce the Glycerine required for the gun powder to smash Adolph, Benito and Tojo. There is enough explosive hidden in ten pounds of waste fat to fire forty-nine anti aircraft shells.

In the past we have received most all our Fat requirements from the far Eastern sources. Now cut off by the Japs.—Coconut Oil and Copra from the Philippines — Palm Oil from Dutch East Indies and Malaya — Tung Oil from China — Perilla Oil from Manchuria and Japan. As in so many other materials problems, this loss of our normal sources of supply of Fats and Oils is vitally im-

portant to our War efforts and economy.

Our problem is to replace all of this loss. It is being replaced partly by some imports from our good friends in Central and South America but the biggest source of all has never been fully tapped. That source is in our own kitchens. Needless to say, this Canada-wide Campaign depends almost entirely on the Home Front — on the continued efforts of everyone in Canada. This is a challenge to every Canadian Housewife, restaurant and hotel owner for it is their job to see that this Fat is saved out of Canada's frying pans and broilers — from the dripping of steaks and chops, beef and pork and lamb roasts, chicken and turkey, as well as ducks and geese — must come fat for Glycerine so urgently needed to make explosives for shells and bombs and depth charges to win the War — and that adds up to deadly proportions for Hitler and Co.

Individually, we may look at the small amount we are able to save daily from dripping and from other sources and decide that it hardly seems worthwhile. Let us all remember that if every person in Canada saves as little as two ounces of Waste Fat in a week, it will be an adequate answer to this National War Effort and appeal. Saving waste fats is one of the simplest War aids asked by your Country, and it is one of the most important ones on the Home Front, so join the proud ranks of the Kitchen Commanders. Your uniform may be only a plain apron but it can be as gallant an outfit as the togs and helmet of the Bombardiers in a Flying Fortress.

TONY MAZZETONI  
Heard regularly over the CBC

## CANADA NEEDS 40 MILLION POUNDS OF FATS FOR EXPLOSIVES

Here is a day-to-day War Job for You!

There is a serious shortage of Fats and Bones in Canada and the only way in which this shortage can be overcome is by the day-to-day saving of every spoonful of dripping, every piece of scrap fat and every bone, cooked, uncooked or dry. Fats make glycerine and glycerine makes high explosives—explosives to bomb the Axis partners—Adolph, Benito, Tojo, sink their U-boats, destroy their tanks. Bones produce fat. Also glue for war industry.

### HERE IS WHAT YOU DO

Save every kind of waste dripping. All may be mixed together. Strain through an ordinary metal strainer into a clean wide-mouthed can. Do not use a glass or paper container. Keep in a refrigerator or a cool place until you have collected a pound or more. Save all pieces of leftover scrap fat from your meats (cooked or uncooked). Keep separate from your drippings. Keep scrap fats and bones in a cool place.

### HERE IS HOW TO DISPOSE OF FATS AND BONES

The Meat Dealers of Canada as a patriotic effort, are co-operating with the Government in this all-important war work by contributing their collection facilities. Now you can dispose of your Fats and Bones in any one of the following ways:

1 YOUR MEAT DEALERS will pay you the established price per pound for your fat dripping and your scrap fat. You can keep this money for yourself or—

2 YOU CAN TURN THE PROCEEDS over to your local Voluntary Salvage Committee and/or to a registered local War Charity.

3 YOU CAN DONATE your Fats and Bones to your local Voluntary Salvage Committee in any place where they collect them, or—

4 YOU CAN CONTINUE to place out your fats and bones for collection by your Street Cleaning Department where such a system is in existence.

Every spoonful of dripping, every piece of fat and every bone, cooked, uncooked, or dry, must be saved. It's a day-to-day job. Your contribution may seem small and unimportant, but even one ounce of fat dripping per person per week will give us 36,000,000 pounds of Fat each year for glycerine.

Hotels, Restaurants—Your support urgently needed!

VOLUNTEER WORKERS  
make your  
Red Cross Dollars  
Stretch Farther**

• Toiling daily in selfless devotion, Canadian women labor to make YOUR Red Cross dollars stretch farther. They sew and knit garments, pack food and supplies, fill precious boxes for our boys in enemy prisons. Since the war began, Red Cross "Blue Smock" workers have made millions of articles from approved patterns, packed millions of cases, for fighter and civilian comfort and relief. Other volunteer women, specially trained, drive cars, trucks, ambulances, help as nurses and nursing aides, office workers and dietitians. Hundreds of doctors, too, give their time freely to help relieve human suffering. The 857,000 members of the Junior Red Cross also, are doing work of untold value. These volunteers make YOUR Red Cross dollars go farther for material, food, medical supplies, preparation of blood serum, for our fighters and war victims on the world's war fronts. This must go on. As the war expands, intensifies, the need grows. Never was the need for YOUR dollars so great.

### NEW CJOC PROGRAM

Broadcasting Station CJOC, Lethbridge, is scheduling a new series of interesting broadcasts on Thursday at 9:00 p.m. The programs are under the title "This Is Our Enemy", and detail in a dramatic form, the "Master Race" plans of the Nazis and the Japs.

Each broadcast is a testimonial to the cause of the United Nations and the part being played by the oppressed and maltreated population of the occupied countries.

"This Is Our Enemy"—a vivid portrayal of authentic facts and conditions in war torn Europe is presented by a cast of radio stars and produced in co-operation with war authorities.

This timely series of broadcasts is being contributed by CJOC to the various patriotic campaigns sponsored by the Government.

Morrel Elder is busy hauling rock from his farm to the river in Lethbridge, where they are being used to reinforce the approach at the west side of the river to protect this part of the
